I am an international student at Georgian@ILAC college enrolled in Computer Programming program. I am really interested in learning how the technologies work. I know **python, C/C++, SQL, HTML5, CSS, JavaScript, and data structures & algorithms**. I have made projects in python such as games. I love to read books and do cycling in my free time.

OBJECTIVE

Programmer hoping to work on a real-world software, where I can apply my skills and learn how these software gets developed. By working in software developing environment, I will gain experience and can know how different programmers' co-ordinates while working on a project. I have no experience in this field. But I am a fast learner, and I can understand new tech, concepts, and large code bases quickly.

EDUCATION

12TH GRADE, BVM

- Overall, 94.2%.
- Computer Science and Mathematics 96% each.

COMPUTER PROGRAMMING, GEORGIAN@ILAC
